

KATE GLAZKO

(858) · 900 · 4077 ◊ kateglazko@gmail.com ◊ <https://kateglazko.com>

EDUCATION

- University of Washington** *Expected 2028*
Ph.D. in Computer Science
Advised by Dr. Jennifer Mankoff
- University of Southern California** *Graduated May 2020*
M.S. in Computer Science
- University of Southern California** *Graduated August 2016*
B.S. in Computer Science, B.S. in Business Administration

AWARDS AND HONORS

- [2023] **UW Allen School CSE Research Fellowship** 50% fellowship funding for Year 1.
- [2022] **Tom Wilson Leadership in Disability Award (Finalist)** One of 3 selected finalists.
- [2021] **NSF CSGrad4US Fellowship** \$34,000 for 3 years with an addition \$12,000 per year for COE.
- [2020, 2018] **DEN@Viterbi Scholarship** \$8,592 per semester.
- [2018] **Michael Yasick ADHD Scholarship by Shire** (2.7%) \$2,000 award.
- [2015] **Best Overall, Google Hackathon at WE15**
- [2015] **National Academy of Engineering Grand Challenges Scholar**
- [2015] **USC Honors in Multimedia Scholar**
- [2015] **1st Place, USA SS12 Hackathon by ProjectPossibility at CSUN Assistive Technology Conference**

ACADEMIC RESEARCH EXPERIENCE

- University of Washington** April 2023 - Present
PhD Student- [Make4All](#) *Seattle, WA*
- Led a autoethnography on generative AI and its opportunities for and barriers to accessibility, published at ASSETS 2023. The research was presented by [PI Mankoff at Github Universe](#), an industry conference attended by thousands of developers– as well as by myself at the Allen School CSE Affiliates Day.
 - Current research includes investigating novel interactive interfaces and enhancements to existing tools for (1) generative AI for design of tangibles and fabrication, (2) approaches to using generative AI for broadening access to complex written materials, and (3) reducing disability bias in generative AI that can have a material impact on equity and opportunity. Namely, all of this work focuses on understanding if we can consistently improve GAI performance in domains where there are real-world constraints and build in mechanisms for validation/assessment of outputs that are accessible to all.
- Stanford University** November 2020 - Present
Researcher- [IxD Group](#) *Stanford, CA*
- Research team member of the [Who-Is-Zuki/Perfecto](#) Projects, a mobile health app with a narrative focus, under the leadership of Dr. James Landay and Dr. Elizabeth Murnane.

- Led a successful grant application for the American Diabetes Association, securing \$600,000 over three years for the Perfecto Project, a version of Zuki centering the experiences and stories of Mexican-Americans.
- Analyzed data and contributed to a paper on the Zuki Longitudinal Study, accepted to IMWUT 2023.
- Trained two new Android developers who made significant contributions to the app's code.
- In preparation for the launch of Perfecto, headed an overhaul of the app's engineering and updated its user interface to Material Design, aligning it with other mobile health apps in design standards. Enhanced app accessibility by auditing for color and font size.
- Implemented features for tracking sustainable behaviors and initiated the Zuki for Eco Behavior Change Study, including conducting preliminary interviews.

Stanford University

Researcher- Design Lab

November 2021 - January 2023

Stanford, CA

- Along with Danyang Fan and Dr. Sean Follmer, contributed to a book chapter written on the project's focus group and feedback sessions with visually-impaired individuals which published in Hasso Plattner's Design Thinking Research, Volume 12.
- Stemming from a project started in a graduate-level data visualization class, collaborated with Ph.D. student Danyang Fan to iteratively design and prototype an accessible method for traversing digital graphs.
- Led the engineering efforts for building a spatial-audio augmented experience for traversing a web-based flowchart.

USC Human Robot Interaction Lab

Undergraduate Researcher- HRI

June 2012 - July 2013

Los Angeles, CA

- Worked with Ph.D. student Jill Greczek and Dr. Mataric at the Human-Robot Interaction Lab.
- Assisted the main researcher, Jill Greczek, in running human-robot interaction experiments with autistic students at LAUSD schools.
- Analyzed the outcomes of the experiments, writing a Python script to compare the students' gestures captured on a Kinect to those given to them by a human or a robot.
- Created data visualizations and analysis for an NSF grant application for continued funding.

CSSavvy at Viterbi School of Engineering

Undergraduate Researcher- RoboticsEd

June 2012 - August 2012

Los Angeles, CA

- As a researcher at Dr. Sheila Tejada's CS Savvy Lab, I researched and designed an accessible curriculum for freshmen to learn robotics that was used in the following years' introductory level CS classes.
- My team and I designed an interaction toolkit for programming the Pleo robot through C++.

INDUSTRY FULL-TIME EXPERIENCE

NeuroSmart

Research Scientist

January 2023 - August 2023

San Francisco, CA

- Worked on a novel wearable and mobile tech for law enforcement de-escalation training.
- Performed a mix of research, Android development, user experience design, and testing duties.

Toyota Research Institute

Research Software Engineer via HireArt.

August 2021 - August 2022

Los Altos, CA

- Collaborated with Ph.D. students Anna Kawakami, Luke Guerdan, and Professor Kenneth Holstein at CMU on a project bringing learner-centered AI to social worker training, featured in the Human-Centered Explainable AI at CHI'22.
- Worked with Dr. Ayman Shamma on a mobile-based approach to reducing carbon emissions behaviors by motor vehicle drivers, resulting in a demo paper published in IUI'22 Companion.

- Worked with Dr. Francine Chen and Dr. Laurent Denoue on designing and developing a human-AI interface to increase task completion efficiency, submitted to IUI'23

Mozilla

Software Engineer, Mobile

January 2019 - June 2021

Mountain View, CA

- Drove the development of complex, user-requested features such as the ability to manage Downloads in-browser for the Firefox for Android browser.
- Worked on user-facing features and design improvements such as improving the application's font themes, showing site certificates, and improving the accessibility experience.
- Ideated, prototyped, and presented multiple innovation projects including the new content bundling experience on FireTV that landed in the product and received positive reviews from customers.

Bluescape

Product Manager

August 2017 - December 2018

San Carlos, CA

- Led development teams working on developing mixed-media collaborative workspaces and interactive content APIs that allowed these workspaces to update dynamically and accept many forms of media files.
- Managed and launched the Bluescape Mobile and Bluescape for A.R. product lines.
- Ran lean user research experiments and feature prototype development with customers across industry sectors including government, entertainment, and education.
- Served as a liaison between the development team and one of our largest entertainment industry customers and assisted in securing a seven-figure contract renewal with them.

Mozilla

Software Engineer, IoT

January 2016 - April 2017

Mountain View, CA

- Developed and researched new IoT products with a focus on user benefit and privacy.
- Designed and researched an IoT wearable that allowed people with limited verbal and tactile abilities to communicate to others through their bracelet with simple taps and an LED display.
- Was a founding member on a team that designed a mixed-reality physical board game that could connect elders in nursing homes to game night at home.
- Designed the quadrotor control demo for Project Flyweb, a project allowing control of IoT devices directly from the browser in a secure way.

StealthFly

Co-Founder

January 2015 - July 2020

Los Angeles, CA

- Collaboratively designed StealthFly, the first runner-style game for BLV audiences and prepared for the finals held at the CSUN Accessibility Conference by testing the game with low-vision participants at USC and incorporating their feedback.
- Presented the prototype and research methods at the SS12 USA Hackathon, where a panel of experts in the accessibility field judged our game and awarded us 1st place.
- Iterated on additional feedback that we had received at the conference and published our app to iOS and Android where we acquired more than 1,000 paying customers and were featured positively on an iOS accessibility app review site.

INDUSTRY INTERNSHIP EXPERIENCE

Mozilla

Release Management Engineering Intern

June 2015 - August 2015

San Francisco, CA

- Re-designed and developed new front-end for Firefox Release Notes, which is a high-traffic page viewed by thousands of users.

Mozilla*Mobile Q.A. Engineering Intern*

May 2014 - August 2014

Mountain View, CA

- Created a Selenium Python/JS automated test suite for Firefox OS's Find My Device application which enabled several critical bugs to be caught before being released into production.
- Wrote 2 different developer tools Firefox OS applications that were featured in the app store and received more than 400 downloads.

DreamWorks Animation*Platform Operations Engineering Intern*

January 2014 - May 2014

Glendale, CA

- Converted DevOps' manual method of tracking device storage into an automated dashboard using HTML/CSS/Python Flask which resulted in a 10x faster process for finding out which VM is performing which tasks.

ReachLocal*Software Engineering Intern*

July 2012 - December 2012

Woodland Hills, CA

- Created new automated tests with Selenium and Python and integrated them into a distributable, Java-compatible module with Maven and Jython.

Apple*Campus Rep*

January 2012 - December 2013

Los Angeles, CA

- Partnered with the bookstore to drive sales during large events such as freshman orientation and homecoming.
- Created a new program for marketing Apple products to engineering majors which increased penetration of products to engineering school at USC by 200%.

TEACHING EXPERIENCE

USC Viterbi School of Engineering*ENGR 102 Freshman Academy Coach*

August 2013 - December 2013

Los Angeles, CA

- Served as a class assistant and upper division engineering student mentor to first-year engineering students.

SPEAKER EXPERIENCE

Industry Conferences

- Speaker, *Firefox Nightly: Where The Magic Happens*. Grace Hopper Conference (Orlando, Florida), 2017.

Invited Talks

- Speaker, *AI and Accessibility*. T-Mobile AI and Accessibility conversation, 2023.

ACADEMIC SERVICE

Conference Reviewing

- Student Scholarship Reviewer, TAPIA 2022.

DEI SERVICE

DEI Panels

- Panelist, GEAR Panel/PhD Virtual Information Session, 2023.

- Panelist, Why Go To Graduate School? CMD-IT, 2023.
- Panelist, Neurodiversity Panel at The Bush School, 2023.

NEWS AND OTHER COVERAGE

- [2023] Stefan Milne, UW News, [Can AI help boost accessibility? These researchers tested it for themselves](#)
- [2022] Dominic Lees, The Conversation, [Deepfakes are being used for good – here’s how](#)
- [2015] Ali Mar, The Daily Trojan, [Students develop app for the visually impaired](#)
- [2015] Pragmatic@QMO, Mozilla, [Yekaterina Glazko: techie, learner, and adventurer](#)

OTHER ACTIVITIES

Huskies for Neurodiversity September 2023 - Current
Leadership Team Member *Seattle, WA*

- Working with the organization to bring awareness to educators and faculty on the needs of neurodiverse students.
- Volunteering at social events such as incoming student days to build neurodivergent community at UW.

Bair Island Aquatic Center July 2017 - April 2023
Novice Crew Team Member *Redwood City, CA*

- Trained and competed for the novice crew team.
- Was nominated and voted by the members of the club to receive the Rising Star award in 2018 for significantly improving my fitness and rowing technique.
- Participated in volunteering efforts for supporting local homeless communities, local environmental clean-ups, and fundraising to support adaptive and accessible rowing for disabled rowers and veterans.

Westside German Shepherd Rescue September 2014 - December 2015
Dog Walker *Los Angeles, CA*

- Walked German Shepherds awaiting adoption multiple times a week.
- Introduced prospective adopters to dogs ready for adoption.

USC Aerial Robotics Team January 2012 - August 2014
Software Team Member, President *Los Angeles, CA*

- Worked with a group of students to design, build, and program an autonomous quadrotor with capabilities of wall detection, path following, and object location and retrieval.

Alpha Chi Omega October 2011 - May 2015
Member *Los Angeles, CA*

- Volunteered for organizations focused on assisting survivors of domestic abuse. Participated in outreach and fundraising events for the Good Shepherd Shelter, a local home for women and children who have endured domestic abuse.
